[§] Minimum registration period is 3 months; register by preference monthly.
[†] **NNIS operative procedure category**: enter the appropriate code of the NNIS category the operative procedure is assigned to. For the Quality decree of the Flemish community, surveillance is mandatory for the following NNIS categories: COLO, HER, HPRO, LAM, CBGC, CBGB, VS.
^{*} Surgeon: optional.
[#] If more than one procedure was performed during the same trip to the OR, record **each operation separately** when performed through different incisions (e.g. splenectomy and open reduction of fracture in a polytrauma patient, bilateral hip prosthesis), or through the same incision AND belonging to different procedure categories (e.g. CABG and operation on cardiac valves).
[°] **Multiple procedures**: enter the total number of multiple procedures for each NNIS risk index category, i.e. operations in more than one NNIS operative procedure category performed through the same incision (e.g. CBGB and CARD). See also *Operative Procedure Report Form*: multiple procedure code 2.
[°] **Number of patient-days post-operative**: calculate the total number of patient-days post-surgery for each NNIS risk index category.
⁺ Number of patients with follow-up < 30 days post-surgery (< 1 year if an implant is left in place) = post-discharge missing data.
